

# WIGTOFT PARISH COUNCIL INFORMATION TECHNOLOGY POLICY. ADOPTED BY RESOLUTION 2.3.26

Introduction	2
Purpose of the IT Policy	2
Monitoring of IT use	2
Scope of this policy	2
Computer use	2
Equipment	3
Health and safety	5
Password and authentication policy	5
Monitoring	<b>ERROR! BOOKMARK NOT DEFINED.</b>
Remote working	<b>ERROR! BOOKMARK NOT DEFINED.</b>
Email	7
Use of the internet	7
Use of social media	8

## **Introduction**

Each council will have its own IT setup and, as such, a single 'one-size-fits-all' IT policy is unlikely to be appropriate. Some smaller parish councils may operate with minimal equipment, while others may manage multiple devices connected to a central server. These guidelines are intended to help councils identify key considerations when developing or updating their own IT policy.

Councils that use external IT providers should ensure their policies accurately reflect current practices and contractual arrangements.

## **Purpose of the IT Policy**

The purpose of an IT policy is to establish clear parameters for how councillors, staff, and other authorised users use council-provided technology or equipment in the course of their duties. A well-defined policy helps to:

- Set expectations for appropriate use of equipment and systems;
- Raise awareness of risks associated with IT use;
- Safeguard the council's data and digital assets;
- Clarify what constitutes acceptable and unacceptable use;
- Outline the consequences of policy breaches.

Councils will also need to determine and clearly state whether limited personal use of IT equipment is permitted (for example, checking personal email or online shopping during lunch breaks).

## **Monitoring of IT Use**

As an IT provider, the council has the right to monitor the use of its IT equipment and systems, provided there is a legitimate reason for doing so and councillors, employees and other authorised users are informed that such monitoring may take place. Any monitoring must be proportionate and comply with relevant data protection and privacy laws. Other persons may be included if they access or use council systems e.g. if they have a council e-mail address

## **Scope of this policy**

This policy applies to all councillors, staff, and other authorised users, regardless of their working location or pattern, including those who are home-based, office-based, or work on a flexible or part-time basis. It sets out the expectations for the appropriate use of IT equipment and systems provided by the council.

## **Computer use**

### **1.1 Hardware**

**1.1.1** Wigtoft Parish Council computer equipment is only provided for the clerk for council purposes, however reasonable personal use is permitted (reasonable interpreted as in the

opinion of the Council). Any personal use of our computers and systems should not interrupt our daily council work in any way. Clerks are asked to restrict any personal use to official lunch breaks or before or after working hours.

**1.1.2** Clerk working from home - all laptops, mobile phones etc must be locked away securely in a fireproof cabinet when leaving the home. Laptops must be logged out when not in use.

**1.1.3** All computer and other electronic equipment supplied should be treated with good care at all times. Computer equipment is expensive, and any damage sustained to any equipment will have a financial impact on the council.

**1.1.4** Computer and electronic hardware should be kept clean, and every precaution taken to prevent food and drink being dropped or spilled onto it.

**1.1.5** Equipment should not be dismantled or reassembled without seeking advice.

**1.1.6** Councillors and the clerk are not to purchase any computer or mobile equipment (including software) unless previously authorised.

**1.1.7** Personal disks, USB stick, CDs, DVDs, data storage devices etc cannot be used on council computers.

## **Equipment**

### **2.1 Portable equipment**

**2.1.1** Portable equipment includes laptop computers, netbooks, tablets, mobile and smart phones with email capability and access to the internet etc.

**2.1.2** It is particularly emphasised that council back-up procedures specific to portable equipment should be followed at all times.

**2.1.3** All portable computers must be stored safely and securely when not in use in the office, i.e. when travelling or when working from home. Portable equipment (unless locked in a secure cabinet or office) should be kept with or near the user at all times; should not be left unattended when away from council premises or the home and should never be left in parked vehicles or at any council or non-council premises.

**2.1.4** It is important to ensure all portable devices are protected with encryption in case they are lost or stolen. All smartphones or tablets that hold council data, including emails and files, must be protected with a pin code. Where possible, these devices should also be programmed to erase all content after several unsuccessful attempts to break in. Any security set on these devices must not be disabled or removed.

**2.1.5** If an item of portable equipment is lost or damaged this should be reported to The chair or vice chair.

**2.1.6** Under no circumstances should any non public meeting or conversation be recorded without the permission of those present. This does not affect statutory rights (under The Openness of Local Government Regulations 2014).

In addition, the council does not permit webcams (which may be pre-installed on many laptops) to be used in the workplace, other than for conference calls for council purposes.

## **2.2 Use of own devices**

**2.2.2** Security precautions apply to personal devices as to the council's desktop equipment. For continuity purposes, calls made to external parties (such as Borough Council, County Council, members of the public) must be made on council landlines or mobile phone numbers to ensure that only these numbers are used and/or stored by the recipient, rather than personal numbers. Any emails sent from own devices should be sent from a council email account and should not identify the individual's personal email address.

**2.2.3** Councillors, staff, and other authorised persons that use council systems are expected to use all devices in an ethical and respectful manner and in accordance with this policy. Accessing inappropriate websites or services on any device via the IT infrastructure that is paid for or provided by the council carries a high degree of risk, and, for employees, may result in disciplinary action, including summary dismissal (without notice). For Workers or Contractors, we may terminate the worker agreement. This is irrespective of the ownership of the device used. An example would be downloading copyright music illegally or accessing pornographic material.

**2.2.4** In cases of legal proceedings against the council], the council may need to temporarily take possession of a device, whether council-owned or personal to retrieve the relevant data.

**2.2.5** Wherever possible the user should maintain a clear separation between the personal data processed on the council's behalf and that processed for their own personal use, for example, by using different apps for council and personal use. If the device supports both work and personal profiles, the work profile must always be used for work-related purposes.

**2.2.6** Personal data relating to councillors should not be saved to any personal accounts with third-party storage cloud service providers as this may breach data protection legislation or create a security risk if the device is lost or stolen. This applies especially if the passwords used to store/access data are saved onto the device, or if the service permits councillors, staff, and other authorised users to remain logged in between sessions.

**2.2.7** Personal information and sensitive data should never be saved on councillors, staff, or other authorised users own devices as this may breach confidentiality agreements, especially if the device is used by other people from time to time.

**2.2.8** If removable media are used to transfer data (e.g. USB drives or CDs), the user must also securely delete the data on the media once the transfer is complete.

**2.2.9** Councillors, staff, and other authorised users who open any attachments should ensure that any cached copies are deleted immediately after use. Additional risks include data belonging to the council being accessed by unauthorised persons if the device(s) is lost, stolen, or used without the owner's permission.

**2.2.10** Prior to the disposal of any device that has work data stored on it, and in the event of a user leaving the council, councillors, staff, and other authorised users are required to allow the clerk access to the device to ensure that all passwords, user access shortcuts and any identifiable data are removed from the device.

**2.2.11** Councillors, staff, and other authorised users must take responsibility for understanding how their device(s) work in respect to the above rules if they are accessing council servers/services via their own IT equipment. Risks to the user's personal device(s) include data loss as a result of a crash of the operating system, bugs and viruses, software or hardware failures and programming errors rendering a device inoperable. The council will use reasonable endeavours to assist, but councillors, staff, and other authorised users are personally liable for their own device(s) and for any costs incurred as a result of the above.

## **Health and safety**

**3.1.1** The council has a duty to ensure that regular appropriate eye tests, carried out by a competent person, are offered to employees using display screen equipment. Further details are set out in the council's Health and Safety Policy.

**3.1.2** Any VDU user who feels that their workstation requires changes to make it compliant must speak to the chair or vice chair.

If any hazards are detected at a workstation, including 'noises' from the IT equipment, this should be reported immediately to the chair or vice chair.

## **Password and Authentication Policy**

**4.1.1** All user accounts must be protected by strong, secure passwords. The council follows the National Cyber Security Centre (NCSC) recommendations for creating passwords using three random words (e.g. PurpleCandleRiver). This method helps create passwords that are both strong and easy to remember, while offering effective protection against common cyber threats such as brute-force attacks. This approach is endorsed in NALC guidance.

To further strengthen account security:

- Initial user account passwords must be generated by the IT provider.
- Default passwords provided by vendors or the IT provider must be changed immediately upon installation or setup.
- Service or System (e.g. Website) account passwords are generated and managed by the IT provider.
- The council recommends these practices as part of its commitment to robust information security and to support compliance with the UK GDPR and the Data Protection Act 2018.

For more guidance, see the NCSC's advice on password security: [NCSC Password Guidance](#)

#### **4.1.2 Access to Passwords**

- Passwords are personal and must not be shared under any circumstances.
- Only the assigned user of an account may access or use the associated password.
- In exceptional cases (e.g., incident response or employee offboarding), access to system credentials may be granted to authorised personnel from the IT provider with appropriate approvals and logging.
- Administrative credentials must be stored securely and only accessible to authorised personnel with a copy provided to the chair in a sealed envelope, only to be accessed in an emergency.

#### **4.1.3 Password Storage and Management**

- Passwords must not be stored in plain text or written down in insecure locations.
- Passwords must be stored using a council-approved, encrypted password manager (e.g., LastPass, Bitwarden, or KeePass).

#### **4.1.4 Password Change Requirements**

- Immediately change password if compromise is suspected.

#### **4.1.5 Password Access Control and Logging**

- All access to administrative or shared credentials must be logged and auditable.
- Attempts to access unauthorized passwords will be treated as a security incident.

#### **4.1.6 Responsibility**

- Users are responsible for creating and maintaining secure passwords for their accounts.

**5.1.1** Increased IT security measures apply to those who work away from their normal place of work (e.g. whilst travelling, working from home or at a meeting site as follows:

- if logging into the council's systems or services remotely, using computers that either do not belong to the council or are not owned by the user, any passwords must not be saved, and the user must log out at the end of the session deleting all logs and history records within the browser used. If the configuration of the device does not clearly support these actions (for example at an internet café), council services should not be accessed from that device;
- the location and direction of the screen should be checked to ensure confidential information is out of view. Steps should be taken to avoid messages being read by other people, including other travellers on public transport etc;
- any data printed should be collected and stored securely;
- all electronic files should be password protected and the data saved to the council's system/services when accessible;

- papers, files or computer equipment must not be left unattended at any premises.
- any data should be kept safely and should only be disposed of securely.
- papers, files, data sticks/storage, flash drive or backup hard drives should not be left unattended in cars, except where it is entirely unavoidable for short periods, in which case they must be locked in the boot of the car. If staying away overnight, council data should be taken into the accommodation, care being taken that it will not be interfered with by others or inadvertently destroyed.

## **Email**

**6.1.1** Council email facilities are intended to promote effective and speedy communication on work-related matters. Although we encourage the use of email, it can be risky. Councillors, staff, and other authorised users need to be careful not to introduce viruses onto council systems and should take proper account of the security advice below.

**6.1.2** On occasion, it will be quicker to action an issue by telephone or face to face, rather than via protracted email chains. Emails should not be used as a substitute for face to face or telephone conversations. Councillors, staff, and other authorised users are expected to decide which is the optimum channel of communication to complete their tasks quickly and effectively.

**6.1.3** All councillors, staff, and other authorised users who need to use email as part of their role will normally be given their own council email address and account. The council may, at any time, withdraw email access, should it feel that this is no longer necessary for the role or that the system is being abused.

**6.1.4** Email messages sent on the council's account are for council use only. Personal use is not permitted.

## **Use of the Internet**

**7.1.1** Much of what appears on the Internet is protected by copyright. Any copying without permission, including electronic copying, is illegal and therefore prohibited. The Copyright, Designs and Patents Act 1988 set out the rules. The copyright laws not only apply to documents but also to software. The infringement of the copyright of another person or organisation could lead to legal action being taken against the council and damages being awarded, as well as disciplinary action, including dismissal, being taken against the perpetrator.

Authorised users should not assume that because a document or file is on the Internet, it can be a difference between information in the 'public domain' (which is no longer confidential or secret copyright protected) and information which is not protected by copyright.

7.1.2 Usually, a website will contain copyright conditions; these warnings should be read before downloading or copying.

7.1.3 Copyright and database right law can be complicated. Councillors, staff, and other authorised users should check with the clerk if unsure about anything.

## **7.2 Trademarks, links and data protection**

7.2.1 The council does not permit the registration of any new domain names or trademarks relating to the council's names or products anywhere in the world, unless authorised to do so. Nor should they add links from any of the council's web pages to any other external sites without checking first with the clerk.

7.2.2 Special rules apply to the processing of personal and sensitive personal data. For further guidance on this, see the council's data protection policy, a copy of which is on the Parish Council's website.

## **7.3 Accuracy of information**

7.3.1 One of the main benefits of the internet is the access it gives to large amounts of information, which is often more up to date than traditional sources such as libraries. Be aware that, as the internet is uncontrolled, much of the information may be less accurate than it appears.

## **Use of social media**

**8.1.1** Social media includes blogs; Wikipedia and other similar sites where text can be posted; multimedia or user generated media sites (YouTube); social networking sites (such as Facebook, LinkedIn, X (formerly known as Twitter), Instagram, TikTok, etc.); virtual worlds (Second Life); text messaging and mobile device communications and more traditional forms of media such as TV and newspapers. Care should be taken when using social media at any time, either using council systems or at home.

**8.1.2** The council recognises the importance of councillors, staff, and other authorised users joining in and helping to shape sector conversation and enhancing its image through blogging and interaction in social media. Therefore, where it is relevant to use social networking sites as part of the individual's position, this is acceptable.

However, inappropriate comments and postings can adversely affect the reputation of the council, even if it is not directly referenced. If comments or photographs could reasonably be interpreted as being associated with the council, or if remarks about external stakeholders could be regarded as abusive, humiliating, sexual harassment, discriminatory or derogatory, or could constitute bullying or harassment, the council will treat this as a serious disciplinary offence. Councillors, staff, and other authorised users should be aware that parishioners or other local organisations may read councillors, staff, and other authorised users' personal weblogs, to acquire information, for example, about their work, internal council business, and employee morale. Therefore, even if the council is not named, care should be taken with any views expressed.

**8.1.3** To protect both the council and its interests, everyone is required to comply with the following rules about social media, whether in relation to their council role or personal social networking sites, and irrespective of whether this is during or after working hours:

**8.1.4**

- Contacts from any of the council's databases should not be downloaded and connected with on LinkedIn or other social networking sites with electronic address book facilities, unless this has been authorised.
- Any blog that mentions the council, its current work, councillors, employees, other users associated with the council, partner organisations, local groups, suppliers, parishioners, should identify the author as one of its councillors or employees and state that the views expressed on the blog or website are theirs alone and do not represent the views of the council. Even if the council is not mentioned, care should be taken with any views expressed on social media sites and any views should clearly be stated to be the writer's own (e.g. via a disclaimer statement such as: "The comments and other content on this site are my own and do not represent the positions or opinions of my employer/ the council.") Writers must not claim or give the impression that they are speaking on behalf of the council.
- The council expects councillors, staff, and other authorised users to be respectful about the council and its current or potential Council, Councillors and staff and not to engage in any name calling or any behaviour that will reflect negatively on its reputation. Any unauthorised use of copyright materials, any unfounded or derogatory statements, or any misrepresentation is not viewed favourably and could constitute gross misconduct.
- Photos or videos that include employees or other workers wearing uniforms or clothing displaying the council's name or logo should not be posted on social media if they could reflect negatively on the individual, their role, their colleagues, or the council. Additionally, photos, videos, or audio recordings must not be taken on council premises without explicit permission
- Comments posted by councillors, staff, and other authorised users on any sites should be knowledgeable, accurate and professional and should not compromise the council in any way.
- Any writing about or displaying photos or videos of internal activities that involves current councillors, staff, and other authorised persons, might be considered a breach of data protection and a breach of privacy and confidentiality. Therefore, their permission should be gained prior to uploading any such material. Details of any kind relating to any events, conversations, materials or documents that are meant to be private, confidential or internal to the council should not be posted. This may include manuals; procedures; training documents; non-public financial or operational information; personal information regarding other councillors, staff, and other authorised users anything to do with a disciplinary case, grievance, allegation of bullying/harassment or discrimination, or legal issue; any other secret, confidential, or proprietary information or information that is subject to confidentiality agreements. This does not affect statutory requirements to publish information including under the Freedom of Information Act.

- Councillors, staff, and other authorised users must be aware that they are personally liable for anything that they write or present online (including on an online forum or blog, post, feed or website). Councillors should always be mindful of the Members Code of Conduct and Nolan Principles. Employees may be subject to disciplinary action for comments, content, or images that are defamatory, embarrassing, pornographic, proprietary, harassing, libellous, or that can create a hostile work environment. They may also be sued by other organisations, and any individual or council that views their comments, content, or images as defamatory, pornographic, proprietary, harassing, libellous or creating a hostile work environment. In addition, other councillors, staff, and other authorised users can raise grievances for alleged bullying and/or harassment.
- Postings to websites or anywhere on the internet and social media of any kind, or in any press or media of any kind, should not breach copyright or other law or disclose confidential information, defame or make derogatory comments about the council or its councillors, staff, and other authorised users”, or disclose personal data or information about any individual that could breach data protection legislation.
- Contacts by the media relating to the council, should be referred to the clerk.
- Councillors, staff, and other authorised users who use sites such as LinkedIn and Facebook must ensure that the information on their profile is accurate and up to date and must update their profile on leaving the council.
- Councillors, staff, and other authorised users who use X.com, LinkedIn, or other social media/networking sites for council development purposes must ensure they provide the council with login details, including password(s), so that these sites can be accessed and updated in their absence.
- Councillors, staff, and other authorised users who have left the council must not post any inappropriate comments about the council or its councillors, staff, and other authorised users on LinkedIn, Facebook, X.com or any other social media/networking sites.
- During your employment/ involvement with the council, you may create or obtain access to a variety of professional contacts and confidential information. This includes, but is not limited to, contacts made through professional networking platforms such as LinkedIn, where those contacts have been established or maintained in your capacity as a councillor, member of staff, or other authorised user. All such contacts will be considered council property and may be subject to disclosure upon request.

**8.1.5** Note that the council may, from time to time, monitor external postings on social media sites. Any employee who has a profile (for example on LinkedIn or Facebook) must not misrepresent themselves or their role with the council. Councillors, staff, and other authorised users are also advised that social media sites are not an appropriate place to air council concerns or complaints: these should be raised with the council or formally through the grievance procedure.

### **Misuse**

Misuse of Council owned IT systems and equipment is not in line with the council’s standards of conduct and will be taken seriously. Any inappropriate or unauthorised use may lead to formal action, including disciplinary proceedings or, in serious cases, dismissal.
